A Natural Body Builder

Presentation: 32 oz

Gamma Forte 1150
A Natural Body Builder

Gamma 1150 Forte’ is a feed supplement for horses made with highly concentrated rice bran oil. It contains gamma oryzanol as well as naturally occurring antioxidants in the form of tocopherols and tocotrienols. It is high energy food which is particularly suitable for feeding to horses to promote physical well being and improve overall appearance. Ingredients: Concentrated Rice Bran Oil Gauranteed Analysis: (per oz) Crude Protein...0.05% Crude Fat...98% Crude Fiber...0.08% Ash...0.02% Gamma Oryzanol...2300mg Feeding Directions: Give 1/2 ounce daily. 64 Day supply
IronXcell.
Iron & B vitamin tonic

Presentation: 128 oz (Gallon)
IRONXCELL is a premium, concentrated Iron Enriched B vitamin syrup with added Ginseng needed for red blood cell (RBC) synthesis and top performance. It also contains Sorbitol, which enhances the serum concentrations that result from the oral administration of Vitamin B12. Competition horses need dietary supplementation of B complex vitamins and Iron, as these nutrients are needed for red blood cell formation and important metabolic functions relating to exercise. IRONXCELL will supply these nutrients to fortify and strengthen performance horses, which will ensure that their full athletic potential is expressed in competition. Research has shown that athletes perform more consistently and display better health and vitality during a long season when supplemented with Siberian Ginseng. IRONXCELL is a highly palatable homogenised syrup which is fully in solution for enhanced absorption. IRONXCELL will encourage an aggressive appetite. IRONXCELL is an excellent nutritional tonic for all horses in training and post-antibiotic treatment. IRON X CELL is a highly palatable homogenised syrup which is fully in solution for enhanced absorption.

The difference between two athletic horses of equal ability is very often the quality of nutrition they receive. Many horses in training are fed a high grain/low forage diet. The digestion of high levels of starch will reduce the pH of the caecum. This can result in the depletion of the B vitamin producing bacteria in the hindgut. B complex vitamins are water soluble, therefore they must be frequently supplemented as they are not stored in the body for any length of time.

Feeding Instructions: IRONXCELL should be added to the normal feed ration.
Yearlings
Feed 30 ml (approx. one fl oz) daily.

Electrolyte Gold
Premium Electrolyte Supplement

Syringe Paste or Sachets/ Presentation: 30 x 50g, 100 x 50g (12lb)

ELECTROLYTE GOLD is a scientifically formulated product containing essential electrolytes and vitamins in an amino acid and glucose base. Horses cool their bodies by sweating in large amounts and this results in a loss of electrolytes. Packed in convenient single feeding sachets, ELECTROLYTE GOLD will "refresh" horses in training. The addition of high levels of the antioxidant Vitamins E (1000iu) and C (750mg) will also protect muscle tissue by eliminating 'free radicals', noxious by-products of exercise. Glycine and Glucose improve the rate of absorption of electrolytes in the gastrointestinal tract.

Electrolyte Gold®

Premium Electrolyte Horse Supplement

- ELECTROLYTE GOLD® is a scientifically formulated horse supplement product containing essential electrolytes and vitamins in an amino acid and glucose base.
- ELECTROLYTE GOLD® replenishes essential electrolytes when they are lost through sweating.
- ELECTROLYTE GOLD® horse supplement will ‘refresh’ horses in training resulting in consistent top performance.
- ELECTROLYTE GOLD® contains a concentrated level of the antioxidant vitamins: Vitamin E (1,000iu) and Vitamin C (750mg) per 50g sachet. Both of these antioxidant vitamins protect muscle tissue by eliminating 'free radicals', a noxious by-product of exercise.
- ELECTROLYTE GOLD® horse feed supplement contains the amino acid Glycine which has been shown to improve the rate of absorption of electrolytes in the gastrointestinal tract.
- ELECTROLYTE GOLD® horse mineral supplement is formulated using a glucose base to enhance absorption of these essential electrolytes.
Horses cool their bodies primarily by sweating in large amounts. Sweating results in the loss of not only water, but also essential electrolytes. Low electrolyte levels in horses can result in poor performances due to dehydration, muscular problems such as ‘tying up’ syndrome and lactic acid build up in the muscles. Electrolyte losses are significantly increased during hot weather and increased exercise. This places even greater importance on the practice of regular and routine electrolyte supplementation.

The first choice of top professionals is ELECTROLYTE GOLD® because they know it delivers a ‘winning performance’.

Premium quality ELECTROLYTE GOLD® delivers potency, palatability and high absorption with the benefits of antioxidant vitamins for maximum results.

**Feeding Instructions:**
ELECTROLYTE GOLD® should be added to the normal feed ration.

*For Pre-Race and Competition Horses:* One 50 g sachet per day.
*In Hot Climates and Horses in Transit:* One 50 g sachet per day.
*Horses in Light Training:* One 50 g sachet every second day.

Fresh drinking water should be available at all times.

Complementary Feeding stuff for Horses.

CALPHORMIN is unique in that it contains a balanced combination of macro-minerals, trace minerals, amino acids and the added benefit of Sodium Zeolite a bioavailable silicon-containing compound. The foundations for a horse's future success can be laid down before it is even born. Ensuring the broodmare has the correct balance of macro-minerals, trace minerals, and amino acids to pass on to her new born, CALPHORMIN will give the young horse the best start it can get. Continuing to feed the young, rapidly growing horse CALPHORMIN will optimise its growth and bone development, in a correct and balanced way. A powdered vitamin that provides the elevated requirements of the essential nutrients needed for optimum skeletal development in growing horses.

**Feeding Instructions:** Mare in foal (months 9, 10, 11): 120g per day. Lactating mare: 120g per day. Weanling (6-12 months): 60g per day. Yearling: 60g per day. Two year old: 60g per day.

GNF
Gut nutrition formula

Presentation: 6lb / 22lb

GNF is a unique supplement, for daily feeding to horses prone to gastric disturbances. GNF will assist in maintaining optimum gut health and function, allowing maximum utilisation of feed. GNF supplies a unique formulation of prebiotics, amino acids, seaweed extract and specific minerals necessary to aid in the recovery and maintenance of a healthy digestive tract. It is sold in a convenient pelleted formulation.

Feeding Instructions: All horses: Feed 50g twice daily.

Ponies and foals: Feed 25g twice daily.

Bioactive
Pre-race energy booster syringe

Presentation: 24 x 2.11 oz

Bioactive is a scientifically formulated combination of natural raw materials. Each of these ingredients have been chosen for their individual energy and vitality giving properties.

Bioactive combines Bee Pollen, TMG, L-Carnitine and Vitamin B12 in a convenient dosing syringe to ensure your horse ‘stays the distance’.

**Feeding Instructions:** Feed one syringe of Bioactive each day for 2 days before the race/competition and one syringe the morning of the race/competition.

Good as Gold.
A calming supplement

**Presentation: 2.2 lb**

Good as Gold should be fed to nervous, hot or stressed horse. It contains a high concentration of L-Tryptophan, an essential amino acid and Vitamin B1 (Thiamine); as well as the antioxidant Vitamin E. Trainers have noted that after a few days of feeding supplemental levels of these ingredients, horses become more relaxed and attentive.

**Feeding Instructions:**
- Pre-competition: Feed 50g/1 sachet of Good as Gold per day, 3 to 4 days prior to competition.
- Stressful situations: Feed 50g/1 sachet of Good as Gold per day, 3 to 4 days prior to these situations.
- Maintenance: Feed 25g/half sachet per day.

GOOD AS GOLD 40g concentrated sachet contains the same active materials as 50g from a multi dose pack.
Creatine Gold
High energy muscle food

Presentation: 5lb

Creatine is a nutrient found naturally in the body. Creatine when ingested bonds with phosphoric acid to form the high energy compound ‘creatine phosphate’. It is this energy rich compound that will keep muscles working at maximum output for longer. By supplementing with Pure Power Creatine you are ensuring the maximum availability of Creatine.

DIRECTIONS FOR USE: Feed Creatine GOLD to maximize the level of stored Creatine Phosphate.
Creatine Gold Should be added to the normal feed ration.
LOADING: 2oz = 2 level scoops two times per day for five days.
MAINTENANCE: 1oz = 1 level scoop once per day thereafter.
One Level Scoop = 1 oz.
GUARANTEED ANALYSIS:
Per 1oz (28g) ... 28,349mg
99% Creatine Monohydrate
Everyday Gold
Electrolyte Supplement

Presentation: 11lb / 22lb

Everyday Gold is a concentrated scientifically formulated & cost effective electrolyte supplement with no fillers. Everyday Gold is an Isotonic Feed Supplement designed for everyday use in performance horses. Each 25g serving has been formulated to replace the body salts lost in 1/2 US Gallon of equine sweat. Horses cool their bodies by sweating in large amounts and this results in a loss of electrolytes. Everyday Gold will assure the levels of electrolytes for horses in training. Premium quality Everyday Gold delivers potency, palatability and high absorption with the benefits of antioxidant vitamins for maximum results. The 11 lb tub provides approximately a 200 day supply for one horse.
MSM Gold
Anti-inflammatory Supplement

Presentation: 2lb / 5lb / 20lb

Directions For Use: Feed one level scoop per day with feed. Guaranteed Analysis: Per Scoop ...

0.35oz (10,000mg) 99.9 pure MSM (Methysulfonylmethane) MSM is a concentrated source of sulphur. This product is free from all fillers and sugars. The FDA has not established a minimum daily requirement for MSM.
Staysound
Cool and Soothing Leg Clay

Presentation: 11lb / 25lb / 44lb

STAYSOUND is an internationally acclaimed cold clay which cools, soothes and tightens hot tired legs. STAYSOUND is ready to use, easy to apply and has a superior longer lasting formula, with no need to wrap or bandage, and is easy to wash off.

Directions for Use: Routine use: Apply directly to knees, fetlocks, shins and tendons after periods of training. Spread evenly about 6mm thick.
For more prolonged effect: Wrap with moistened brown paper and bandage. Repeat as necessary after 24 hours.
To remove: Hose off with water.
